Coast Guard Safety Recall

5.0/5.7L Ignition Coil Wire Replacement

**Engines Affected: 5.0L MPI (Pro Ski)
5.7L MPI (Excalibur)**

Model Number: Last Digit "M"

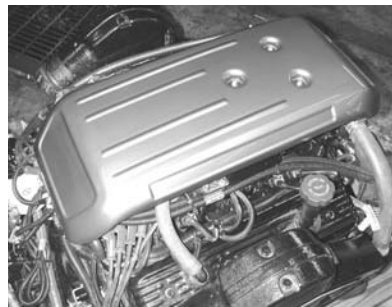

Serial Numbers Affected: 420733-430688

Coast Guard Safety Recall #020196S addresses a possible safety issue with the 5.0L and 5.7L ignition coil wire. The condition associated with this recall is the possibility of arcing and/or open flame at the coil wire connection to the ignition coil and/or distributor cap. Replacement of the ignition coil wire is required in order to correct this condition.

IMPORTANT: The OLD ignition coil wire to be removed and discarded is BLACK, and the correct replacement ignition coil wire is RED. If the ignition coil wire is already RED, the engine has the correct ignition coil wire.

1. Ignition switch turned to the OFF position.
2. Remove the hood.

Pro Ski

Excalibur

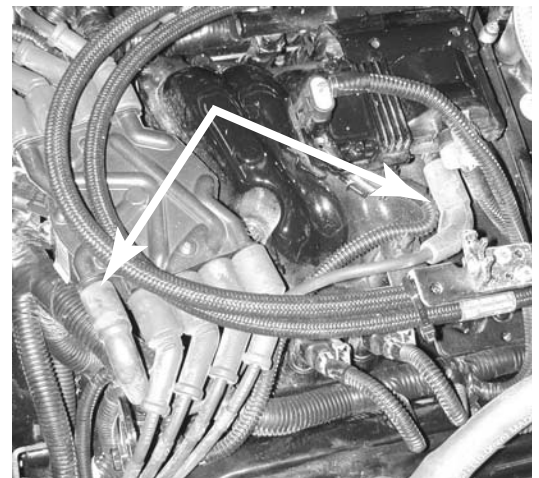

3. Remove the old ignition coil wire (BLACK) from the ignition coil and distributor cap.

IMPORTANT: THE BLACK IGNITION COIL WIRE MUST NOT BE REUSED. DISCARD THE BLACK IGNITION COIL WIRE.

4. Install the new ignition coil wire (RED) onto the ignition coil and distributor cap.

IMPORTANT: Make sure the ignition coil wire is pushed securely onto the towers of the ignition coil and the distributor cap. The wire will snap into the tower when properly installed.
